

Before the sun rises, you're out there. In the hot mid-day sun, you're alone on the water. Two hours after you planned to call it a day the fish are biting, so you stay right where you are. Some people may say you're obsessed. But at MotoCraft, you're an inspiration to us. Your dedication and love of the water keeps us committed to building the best boats anywhere. And this year, our line of utility boats is better than ever with sturdy aluminum hulls designed to effortlessly cut through the water and easy handling with quick planing and tight cornering. They're made to last, too, with builtin corrosion resistance and performance you can count on year after year. So the boat you take your littlest fisherman out on today will still be good to go when he's big enough to stand shoulder to shoulder with you as you reel 'em in. As long as you're out there, MotoCraft will be here — making the best boats on the water
